

## Dr. Claudia Albers' Predicted Dates

Matthew 24:36 (NKJV)

No One Knows the Day or Hour

36 "But of that day and hour no one knows, not even the angels of heaven, but My Father only."

Matthew 24:22 (NKJV)

And unless those days were shortened no flesh would be saved; but for the elect's sake those days will be shortened.

Only God knows when the rapture and when the end of the world as we know it will occur. Most of Dr. Claudia Albers predictions have already come true, but her predicted dates don't seem to be accurate. Why?

I believe it has to do with what Dr. Claudia Albers has already told us. She told us that Earth is being moved across the universe to an area where Satan places dead planets. I am assuming that this movement of Earth would probably be occurring at the speed of light.

The theory of relativity, essentially says the faster an object moves the more that time is affected. Time is essentially altered for that object that is moving.

Suppose that you had a clock on Earth showing this altered time and you had another clock stationary (not moving) in space. The (altered time) clock on Earth would show that altered time due to the movement of the Earth. The clock in space (actual time) would also show the time, but it would be the actual time. The times for these two clocks would be different. This is what I would call a time lag, i.e. "those days were shortened".

People on Earth would not perceive anything unusual about their time, since they like the clock and Earth are hurling through space at the speed of light. Time is relative to our surroundings on the moving Earth.

So Dr. Claudia Albers is attempting to predict a date of an event, but due to the "theory of relativity", Earth's time has been altered, making it exceedingly difficult to predict the actual time of that event.
